

Massage Therapy and Therapeutic Touch

Any members of the church, both ordained and lay, who wish to exercise ministry in either of these disciplines must be duly trained and accredited by the appropriate organization.

Massage therapy is regulated by the College of Massage Therapists of Ontario. The Therapeutic Touch Network of Ontario functions as the regulating body.

Any priest wishing to exercise either of these therapies and trained to do so, must be authorized by the bishop. Any lay person would operate under the guidelines of the *Ministry of Healing*.

These may develop as important new approaches within the healing ministry of the church and theologically speak of the unity of body, soul and spirit.
